

KIRTAN DAVE

Program Manager | Enterprise Transformation | ERP & Digital Portfolios

Enterprise Program Manager with 14+ years of experience leading large-scale transformation portfolios across ERP, digital platforms, and AI-driven applications within enterprise environments. Currently driving multi-million-dollar programs at TMRW – Varkey Foundation, spanning AI-powered parent experience platforms, agentic AI solutions for ERP (D365 F&O) and HR, and backend-agnostic AI agents serving diverse personas including school leaders, administrators, teachers, parents, and students. Proven ability to establish strong governance, manage complex multi-stream delivery, and translate emerging technologies into measurable business value. Trusted partner to senior leadership (CFO, COO, CIO) for AI adoption, digital enablement, cost optimization, and enterprise-wide change.

Profile Summary

- Led enterprise transformation programs across ERP, CRM, digital platforms, and AI for UAE and education organizations, delivering finance, supply chain, and EAM solutions across 5 business sectors, reducing processing time by 25% and improving reporting quality.
- Program Lead for AI applications in education, including PXP (Parent Experience Platform) a prompt-based AI solution providing parents real-time student updates, communications, and fee/extracurricular payments, with strong focus on data privacy and adoption.
- Defined and secured executive approval for multi-country ERP, CRM, and AI transformation business cases, aligning technology roadmaps with financial and operating objectives.
- Led delivery of AI agentic solutions integrated with Microsoft Dynamics 365 F&O and HR, enabling intelligent assistants for finance operations, HR queries, reporting, and workflow automation.
- Oversaw rollout of backend-agnostic, persona-based AI agents for school leaders, administrators, teachers, parents, and students, improving decision support and operational efficiency.
- Achieved 20% cost optimization across ERP and AI programs through strong governance, risk management, and vendor optimization.
- Served as Program Transformation Lead and trusted advisor to CXO stakeholders, ensuring ERP, CRM, and AI initiatives aligned with business priorities and achieved sustained adoption.
- Owned end-to-end program delivery including planning, budgeting, risk, quality, and governance, ensuring delivery aligned with enterprise and responsible AI standards.
- Drove strategic IT, digital, and AI operating models to enable cost reduction, scalability, and long-term business value.
- Provided program-level leadership, embedding Agile and hybrid delivery practices to improve predictability, team performance, and AI adoption. Provided program-level leadership and thought direction, embedding Agile and hybrid delivery practices at scale through a servant-leadership approach, improving delivery predictability, team performance, and AI adoption outcomes.
- A leader & a critical thinker with analytical, interpersonal and problem-solving skills

Key Impact Areas

- Enterprise Program & Portfolio Management (USD 5M+)
- Enterprise Program & Portfolio Management (USD 5M+)
- AI Program Management (Prompt-Based Applications & Agentic AI)
- Multi-Stream Delivery (ERP, CRM, Mobile, Digital, AI)
- Executive Governance, Steering Committees & Board Reporting
- AI Use-Case Identification, Prioritization & Road mapping
- Business Case Development, Benefits Realization & KPI Tracking
- Budget Ownership, Financial Control & ROI Optimization
- Risk, Dependency, Change & Responsible AI Governance
- Vendor, SI & Partner Management
- Agile / Hybrid Delivery Models at Scale
- CXO Stakeholder Engagement (CFO, COO, CIO)

Soft Skills

- Analytical
- Pragmatic
- Strategic Thinker
- Problem Solver
- Communicator
- Team Management & Leadership

Work Experience

Since Jun' 25 with TMRW, Dubai as – Program Manager

Role:

- Lead an enterprise transformation portfolio valued at USD 5–8M spanning ERP, CRM, mobile applications, digital platforms, and AI-driven programs across multiple business units.
- Own end-to-end program governance, financial control, and executive reporting, ensuring alignment with organizational strategy, cost-saving targets, digital adoption, and AI value realization goals.
- Established portfolio-level governance frameworks, dependency management, and benefits tracking across 6+ parallel workstreams, including AI pilots and scaled deployments.
- Program Lead for AI Applications & Agentic Platforms supporting education-sector stakeholders (school leadership, administrators, teachers, parents, and students).

- **Parent Experience Platform (PXP):** Leading delivery of a prompt-based AI application enabling parents to receive real-time insights into student progress, activities, communications, and fee-related transactions (tuition and extracurriculars). Own scope, governance, data privacy controls, and adoption KPIs across schools.
- **AI Agentic Framework – D365 F&O & HR:** Acting as a solution architect for AI-enabled business platforms, defining high-level architecture, integration patterns, data flows, and operating models for prompt-based and agentic applications.
- Leading solution design decisions for AI integrations with Microsoft Dynamics 365 F&O and HR, ensuring the architecture supports automation, reporting, user experience, compliance, and future extensibility.
- **Backend-Agnostic AI Agents (Education Sector):** Overseeing design and rollout of reusable, backend-agnostic AI agents serving multiple personas (School Leader, Admin, Teacher, Parent, Student), enabling decision support, operational efficiency, and improved user experience.
- Govern AI initiatives covering responsible **AI, data security, compliance, and model lifecycle management**, ensuring alignment with enterprise architecture and regulatory expectations.
- **Partner with business, IT, and data teams** to identify, prioritize, and roadmap high-impact AI use cases, translating them into funded programs with measurable KPIs.
- Provide structured board-level reporting using dashboards, KPIs, and risk heatmaps for senior leadership and sponsors, including AI adoption, benefits realization, and risk posture.
- Drive Agile delivery practices across cross-functional teams, improving delivery predictability, stakeholder confidence, and enterprise AI adoption.

Mar' 24 – June' 25 with A-Solutions, Dubai as – Delivery Manager ERP

Role:

- Spearheading the end-to-end delivery of **ERP implementations**, from project **scoping through to execution, value realization, and stakeholder engagement**.
- Drove presales engagements for Microsoft Dynamics 365 F&O opportunities, including client discovery sessions, effort estimation, solution scoping, and proposal support.
- Worked closely with business stakeholders to shape solution architecture across finance, supply chain, reporting, integrations, and third-party applications within D365 F&O programs.
- Translated business requirements into high-level solution designs, ensuring alignment with standard D365 capabilities while identifying required customizations, ISV dependencies, and integration touchpoints.
- Supported preparation of commercial proposals, statements of work, implementation roadmaps, and resource plans for ERP transformation initiatives.
- Advised clients on best-fit architecture decisions, balancing out-of-the-box D365 F&O functionality, extensibility, cost, scalability, and delivery timelines.
- Partnered with technical and functional leads to validate solution feasibility, risks, assumptions, and implementation approach during bid and mobilization stages. Strengthened client relationships through a consultative approach, positioning D365 as a strategic enabler of digital transformation.

Nov'21 – Feb' 24 with AL Ghurair Investment, Dubai as Business Applications Manager - Project Manager

Role:

- Led **multi-entity Dynamics 365 Finance and Operations rollouts** across core finance, procurement, EAM, AWM, and supply chain functions, ensuring alignment with enterprise transformation goals.
- Acted as the solution architecture lead for D365 F&O rollouts, ensuring the target design aligned with enterprise finance, procurement, EAM, AWM, and supply chain operating models.
- Led cross-functional workshops to define future-state business processes, solution blueprint, and architecture decisions for multi-entity D365 implementations.
- Evaluated functional gaps and guided teams on fit-to-standard adoption versus customization, improving design quality and reducing long-term support complexity.
- Supported internal business case development and stakeholder buy-in by presenting solution options, implementation approach, value drivers, and architectural considerations to leadership.
- Provided architectural oversight on integrations, data migration, security roles, and reporting design to ensure an end-to-end scalable D365 F&O landscape.

Aug'20-Oct'21 with Perfetto Trading LLC (Nesspresso), Dubai – UAE as Senior consultant - Project Lead

Role:

- Spearheading the end-to-end delivery of Microsoft Dynamics 365 Finance & Operations implementations, including environment management, e-commerce integration, and POS enablement—driving projects from scoping to execution, value realization, and strategic stakeholder alignment.
- Led support and enhancement initiatives for **Microsoft D365 F&O and CE**, ensuring optimal system performance and alignment with business operations. Oversaw vendor engagement and performance management to ensure aligned delivery across D365 integrations, infrastructure, and third-party platforms.
- Drove **advanced WMS and Field Service implementations, collaborating with business stakeholders** to redefine operational workflows.

Oct'19-Apr'20 with DXC Technology, Melbourne – Australia as Senior Consultant

Role:

- Played a pivotal role in the **delivery of ISV and new client implementations of D365 F&O** in Australia.
- Led **discovery and requirement-gathering workshops, resulting in more efficient project timelines** and increased user satisfaction.
- Contributed to presales and solution shaping activities for D365 F&O opportunities by supporting discovery workshops, requirements analysis, and proposed solution approaches.
- Worked with functional and technical teams to develop solution architecture recommendations for ISV and client implementations in the Australia market.
- Assisted in defining high-level architecture, module fitment, integrations, and delivery approach to support client proposals and project initiation.
- Engaged in client discussions to position D365 F&O capabilities and recommend scalable, fit-for-purpose solution designs aligned with business requirements.
- Reviewed requirements from both business and delivery lenses to improve solution feasibility, effort accuracy, and implementation readiness.

Nov'18-Sep'19 with Darkmatter, Abu Dhabi – UAE as Lead Consultant

- I played a proactive role in **enhancing the Dynamics AX 2012 R3 practice**, resulting in significant achievements.
- **Developed Power BI dashboards and generated a range of financial reports**, leading to a 25% improvement in data visualization and reporting efficiency.
- Customized SSRS reports and refined dimensions related to the ledger and organization, which led to a 20% enhancement in reporting accuracy and data analysis capabilities.
- **Successfully installed and configured AX 2012 R3 UAT and Dev servers**, contributing to a 30% reduction in server setup and deployment times, thus optimizing the development environment.

Mar'15-Oct'18 with Dutco Group, Dubai – UAE as Implementation & Support Consultant

- Managed D365 F&O and HCM system implementations using.
- Coordinated with vendors and in-house teams to gather requirements, define solution scope, and manage phased delivery.
- Ensured compliance with regional payroll regulations and successfully communicated critical business processes for system mapping.
- Supported post-go-live stabilization and change requests with continuous user engagement and process alignment.

Previous Work Experience

Oct'14-Mar'15 with A-Solutions, Dubai – UAE as Technical Consultant

Mar'11-Sep'14 with multiple Indian organizations as Software Engineer

Education

- **2025-2026: MIT Digital Transformation in the AI age**
- **2011: B.Tech. (Computer Engineering)** from U.V. Patel College of Engineering, Ganpat University
- **2007: Diploma in Computer Engineering** from B.S. PATEL Polytechnic (T.E.B)

Certifications

- Project Management Professional (PMP)
- Microsoft MB-700: Microsoft Dynamics 365: Finance and Operations Apps Solution Architect
- Microsoft Certified: Dynamics 365: Finance and Operations Apps Developer Associate
- Microsoft MB-500: Microsoft Dynamics 365: Finance and Operations Apps Developer
- Microsoft MB-300 - Microsoft Dynamics 365: Core Finance and Operations
- MS Dynamic AX 2012 MB6-872 Microsoft Dynamics AX 2012 Installation and Configuration
- MS Dynamic AX 2012 MB6-869 Microsoft Dynamics AX 2012 Development Introduction
